

Community and Statewide Resources Case Studies

Josh

Josh is a 37-year old man who has muscular dystrophy and has just returned from visiting his family in the village. Josh lives in a group home. The staff assist him with his personal care like bathing and noticed that Josh had some unusual bruising on his back and upper thighs. When the staff person asked about it Josh said he didn't know how he got the bruises.

Respond to the four questions for this case:

- What do you do first?
- What can your agency offer?
- What services are available in your community?
- Do you need to call APS?
